

Task - 1: Basic Calculator Program

```
#include<stdio.h>
int main ()
{
    char opr;
    float n1,n2;
    printf("select any one operator (-,+,
    %,/,*)A\n");
    scanf("%c",&opr);
    printf("enter the value of n1 & n2 \n");
    scanf("%f%f",&n1,&n2);
    switch(opr)
    {
    case '+':
        printf("sum=%f \n", n1+n2);
        break;
```

case '-':

```
printf("sub=%f \n", n1-n2);
```

```
break;
```

case '*':

```
printf("mul=%f \n", n1*n2);
```

```
break;
```

case '/':

```
if (n2==0)
```

```
{
```

```
printf("error,div by zero \n ");
```

```
break;
```

```
}
```

```
else
```

```
{
```

```
printf("Div=%f\n", n1/n2);
```

```
break;
```

```
}
```

case '%':

```
printf("mod= %d",(int)n1%(int)n2);
```

```
break;
```

default :

```
    printf("Invalid");  
    break;  
}  
return 0 ;  
}
```
